

## INDEX TO VOL. III.

- A**BEL, J. J. On the phenylcarbamic esters of epinephrin, xvii.  
 Alcohol, nutritive value, xiii.  
 ALDRICH, T. B., and E. M. HOUGHTON. On the chromogen of the suprarenal medulla, and on its relationship to the active substance, xxvi.  
 Allantoin, xxxi.  
 —, excretion, 265.  
 Amœba, reaction to light, 9.  
 —, structure, 16.  
 Apparatus for laboratory instruction, xxxii.  
 ASHER, L. See GILES and ASHER, xix.  
 ATWATER, W. O. Abstract of paper on the nutritive value of alcohol, xiii.  
 AUSTIN, M. F. See HOWELL and AUSTIN, xxii.
- B**ERGIN, T. J. See MOORE and BERGIN, 316.  
 BEYER, H. G. See PORTER and BEYER, xxiii, xxiv.  
 Bile, as a solvent, xiv.  
 Bladder, muscles of, 1.  
 —, nerve supply, 1.  
 Blood, coagulation, 78.  
 —, defibrination, 61.  
 Blood pressure, affected by cerebral stimulation, xxii.  
 —, suprarenal extract, xv, xviii.  
 —, proteids, formation, 53.  
 BROWN, E. W. See MENDEL and BROWN, 261.  
 BROWN, E. W. See MENDEL and BROWN, xxxi.  
 BUDGETT, S. P. and J. GREEN, JR. The functional adaptability of afferent nerve fibres, 115.
- C**EREBRAL injections, ix.  
 Chemotaxis, 259, 310.  
 Chilomonas, motor reactions, 397.  
 CHITTENDEN, R. H., and A. C. EUSTIS. The proportion of basic nitrogen yielded by elastin on decomposition with hydrochloric acid, xxxi.  
 CHITTENDEN, R. H., and Y. HENDERSON. The proportion of nitrogen capable of being split off from proteids by the action of acids, xxx.  
 Chloretone, xxvi.  
 Circulation, capillary, xii.  
 —, cutaneous, xii.  
 CLARK, G. P. A model to represent the principal pathways in the nervous system, xxxi.  
 CLEGGHORN, A. and C. C. STEWART. The reaction time of inhibition, xxi.  
 Connective tissue proteids, v.  
 Crayfish, psychophysiology, 404.  
 CURTIS, J. G. The use of excised mammalian muscles for purposes of demonstration, xi.  
 CUTLER, W. D. See GILES and CUTLER, vi.
- D**AWSON, P. M. Infusion after severe hemorrhage, xxviii.  
 DEARBORN, G. V. N. Notes on the individual psychophysiology of the crayfish, 404.  
 Depressor nerve, axiii.  
 Diabetes, 139.
- E**DESTIN, iv.  
 Egg, chemical changes in development, xii.  
 Elastin, decomposition products, xxxi.  
 Electricity, physiological action, xxxi.  
 Entomostraca, reaction to light, 157.  
 Epinephrin, xvii.  
 Ergograph, technique, ix.  
 EUSTIS, A. C. See CHITTENDEN and EUSTIS, xxxi.
- F**AT, extraction from liquids, 183.  
 Fertilization, 135, 434.  
 Fibrinogen, origin, 53.

- G**ARREY, W. E. The effects of ions upon the aggregation of flagellated infusoria, 291.
- GIES, W. J.** The preparation of a mucin-like substance from bone, vii.
- GIES, W. J., and L. ASHER.** The influence of protoplasmic poisons on the formation of lymph, xix.
- GIES, W. J., and W. D. CUTTER.** The gluco-proteids of white fibrous connective tissue, vi.
- GIES, W. J., and L. D. MEAD.** The physiological action of tellurium compounds, xx.
- GIES, W. J., and A. N. RICHARDS.** A preliminary study of the coagulable proteids of connective tissues, v.
- Glucoproteids, vi.
- GREEN, J., JR.** See **BUDGETT and GREEN**, 115.
- GREENE, C. W.** Contributions to the physiology of the California hagfish, *Polistotrema stouti*.—I. The anatomy and physiology of the caudal heart, 366.
- H**AGFISH, caudal heart, 366.
- HARRINGTON, N. R. and E. LEAMING.** The reaction of amoeba to lights of different colors, 9.
- Heart, caudal, of hagfish, 366.
- , rate influenced by respiration, 205.
- , rhythmic contractility affected by inorganic and organic solutions, 123.
- , rhythmical contractions, 383.
- , secondary rhythms, 201.
- , vasomotor nerves, xxiv.
- Heliotropism, 345.
- Hemorrhage, infusion, xxxviii.
- HENDERSON, Y.** Metabolism in the submaxillary gland during rest and activity, 19.
- HENDERSON, Y.** See **CHITTENDEN and HENDERSON**, xxx.
- Hippuric acid, production, 472.
- HOUGH, T.** Certain improvements in the technique of ergographic work, ix.
- HOUGHTON, E. M.** See **ALDRICH and HOUGHTON**, xxvi.
- HOWELL, W. H., and M. F. AUSTIN.** The effect of stimulating various portions of the cortex cerebri, caudate nucleus, and dura mater upon blood pressure, xxii.
- HUBER, G. C.** Observations on the degeneration and regeneration of motor and sensory nerve endings in voluntary muscle, 339, xxxii.
- HUNT, R.** Note on a blood pressure lowering body in the suprarenal gland, xviii.
- I**NFUSION after hemorrhage, xxviii.
- Infusoria, aggregation of, 291.
- , motor reactions, 229.
- Inhibition, reaction time, xxi.
- Intestine, composition of contents, 324.
- , fistula, 316.
- , reaction of contents, 316.
- Iodine in thymus and thyroid gland, 285.
- Ions, effect on movements of infusoria, 291.
- , effect on muscular contraction, 383.
- Ion-proteids, 327.
- J**ACKSON, H. C. See **MENDEL and JACKSON**, iii.
- JENNINGS, H. S.** Studies on reactions to stimuli in unicellular organisms. V.—On the movements and motor reflexes of the Flagellata and Ciliata, 229.
- JENNINGS, H. S.** Studies on reactions to stimuli in unicellular organisms. VI.—On the reactions of Chilomonas to organic acids, 397.
- JONES, W.** On thymine, xxxii.
- K**ARYOKINESIS, relation to coagulation, 80.
- L**ARVÆ from unfertilized eggs, 135, 434.
- LEAMING, E.** See **HARRINGTON and LEAMING**, 9.
- LEE, F. S.** The survival of mammalian muscle after somatic death, xxix.
- LEVENE, P. A.** On mucin, viii.
- LEVENE, P. A.** Some chemical changes in the developing egg, xii.
- LEVENE, P. A.** A method of obtaining nucleic acid, xxxii.
- LEVENE, P. A., and L. B. MENDEL.** Some basic decomposition products of edestin, iv.
- LEVIN, I.** Physiological studies on mucin, xxix.
- Light, action of on protozoa, 9.
- , action on *Cypridopsis*, 345.
- , action on Entomostraca, 157.

- LOEB, J. On ion-proteid compounds and their rôle in the mechanics of life phenomena. I. — The poisonous character of a pure NaCl solution, 327.
- LOEB, J. On artificial parthenogenesis, xxxi.
- LOEB, J. On the artificial production of normal larvæ from the unfertilized eggs of the sea urchin (*Atrachia*), 434.
- LOEB, J. On the different effect of ions upon myogenic and neurogenic rhythmical contractions and upon embryonic and muscular tissue, 383.
- LOEB, J. On the nature of the process of fertilization and the artificial production of normal larvæ (plutei) from the unfertilized eggs of the sea urchin, 135.
- LOMBARD, W. P., and W. B. PILLSBURY. A new form of piston recorder and some of the changes of the volume of the finger which it records, 186.
- LOMBARD, W. P., and W. B. PILLSBURY. Secondary rhythms of the normal human heart, 201.
- LUSK, G. See PARKER and LUSK, 472.
- LUSK, G. See RAY, McDERMOTT, and LUSK, 139.
- Lymph, formation, xix.
- LYON, E. P. A contribution to the comparative physiology of compensatory motions, 86.
- McDERMOTT, T. S. See RAY, McDERMOTT, and LUSK, 139.
- MATHEWS, A. The origin of fibrinogen, 53.
- MEAD, L. D. See GIES and MEAD, xx.
- MELTZER, S. J. On the toxicology of potassium chlorate, with a demonstration of the effects of intracerebral injections, ix.
- MENDEL, L. B. On the occurrence of iodine in the thymus and thyroid glands, 285, xxxii.
- MENDEL, L. B. See LEVENE and MENDEL, iv.
- MENDEL, L. B., and E. W. BROWN. Observations on the nitrogenous metabolism of the cat, especially on the excretion of uric acid and allantoin, 261.
- MENDEL, L. B. and E. W. BROWN. The proportion of basic nitrogen yielded by elastin on decomposition with hydrochloric acid, xxxi.
- MENDEL, L. B., and H. C. JACKSON. On some features of nitrogenous metabolism, iii.
- Metabolism, after splenectomy, iii.
- , nitrogenous, 261.
- MINOT, C. S. An experiment in telogeny, xxxii.
- MOORE, B. On the functions of bile as a solvent, xiv.
- MOORE, B. and T. J. BERGIN. On the chemical reaction of the intestinal contents to various indicators, and on the nature of the contents escaping from a fistula immediately above the ileo-cæcal valve, 316.
- MOORE, B., and H. OERTEL. A comparative study of reflex action after complete section of the spinal cord in the cervical or upper dorsal region, 45.
- MOORE, B., and C. PURINGTON, xvi. On the chromogen of the suprarenal medulla, and on its relationship to the active substance, xvi.
- MOORE, B., and C. PURINGTON. On the effects of intravenous injection of minimal doses of suprarenal extract upon the arterial blood pressure, xv.
- Movements, compensatory, 86.
- Motor reactions, unicellular organisms, 229.
- Mucin, vi, vii, viii, xxix.
- MUEHLBERG, W. See PORTER and MUEHLBERG, xxiv.
- Muscle, nerve-endings, 339.
- , smooth, of mammals, xxv.
- , surviving mammalian, xi, xxix.
- NERVE, degeneration and regeneration, 339.
- , endings in muscle, 339.
- , sensory, transmission of motor impulses, 115.
- Nervous system, model, xxxi.
- NORMAN, W. W. Obituary, 284.
- NORMAN, W. W. Do the reactions of the lower animals against injury indicate pain sensations? 271.
- Nucleic acid, xxxii.
- OERTEL, H. See MOORE and OERTEL, 45.
- PAIN sensations, 271.
- PARKER, W. P., and G. LUSK. On the maximum production of hippuric acid in rabbits, 472.
- Parthenogenesis, artificial, xxxi.
- Phlorhizin diabetes, metabolism, 139.
- Phlorhizin, metabolism, 261.

- Phosphorus poisoning, metabolism, 139.  
 PILLSBURY, W. B. See LOMBARD and PILLSBURY, 186, 201.  
 Piston recorder, 186.  
 PORTER, W. T. Apparatus for laboratory work by large classes, xxxii.  
 PORTER, W. T., and H. G. BEYER. The relation of the depressor nerve to the vasomotor centre, xxiii.  
 PORTER, W. T., and H. G. BEYER. The vasomotor nerves of the heart, xxiv.  
 PORTER, W. T., and W. MUHLBERG. Spinal respiration, xxiv.  
 Potassium chlorate, ix.  
 Proceedings of the American Physiological Society, iii-xxxii.  
 Proteid molecule, theory, 153.  
 —, nitrogen yield, xxx.  
 Proteids of connective tissue, v.  
 Pulse rate, 201.  
 PURINTON, C. See MOORE and PURINTON, xv, xvi.  
  
**RAY, W. E., T. S. McDERMOTT, and G. LISK.** On metabolism during a combination of phosphorus poisoning and phlorhizin diabetes, 139.  
 Reaction time of inhibition, xxi.  
 Reflex action, 45.  
 REICHERT, E. T. A universal artificial respiration device, xxxii.  
 Respiration apparatus, xxxii.  
 Respiration, spinal, xxiv.  
 Rhythm, affected by ions, 383.  
 RICHARDS, A. N. See GIES and RICHARDS, v.  
 Rotation experiments, 90.  
  
**S**EMICIRCULAR canals, removal, 98.  
 — Sensation in lower animals, 271.  
 Serum albumin, effect on frog's heart, 130.  
 Skin, circulation in, xii.  
 Smooth muscle, contraction, 26.  
 Sodium chloride, its solution a poison, 336.  
 Soxhlet apparatus modified, 183.  
 Spinal cord, reflexes after section, 45.  
 Splenectomy, metabolism, iii.  
  
 STEWART, C. C. Mammalian smooth muscle, xxv.  
 STEWART, C. C. See CLEGHORN and STEWART, xxi.  
 STEWART, C. C. The relaxation of the bladder muscles of the cat, 1.  
 Submaxillary gland in rest and activity, 19.  
 Suprarenal gland, chromogen, xvi.  
 —, extract lowers blood pressure, xviii.  
  
**TAYLOR, A. E.** A modified Soxhlet apparatus for the extraction of fat from liquids, 183.  
 Tellurium, action of compounds, xx.  
 Telogeny, xxxii.  
 Thymine, xxxii.  
 Thymus, iodine, 285.  
 Thyroid, iodine, 285.  
 TOWLE, E. W. A study in the heliotropism of Cypridopsis, 345.  
 Traube-Hering waves, 222.  
  
**U**NICELLULAR organisms, motor reactions, 229, 397.  
 Uric acid, xxxi.  
 —, excretion, 262.  
 Urine, composition, 269.  
  
**V**ASOMOTOR centre, depressor nerve, xxiii.  
 —, influence on heart-rate, 205, 215.  
 Vasomotor nerves, heart, xxiv.  
 Vision, relation to compensatory movements, 106.  
 Volume pulse in finger, 197.  
  
**W**ALDEN, E. C. Comparison of the effect of certain inorganic solutions and solutions containing serum albumin on the rhythmic contractility of the frog's heart, 123.  
 WOODWORTH, R. S. Studies in the contraction of smooth muscle, 26.  
  
**Y**ERKES, R. M. Reaction of Entomotraca to stimulation by light, 157.

# THE AMERICAN JOURNAL OF PHYSIOLOGY

EDITED FOR

*The American Physiological Society*

BY

H. P. BOWDITCH, M.D., BOSTON

R. H. CHITTENDEN, PH.D., NEW HAVEN

W. H. HOWELL, M.D., BALTIMORE

FREDERIC S. LEE, PH.D., NEW YORK

JACQUES LOEB, M.D., CHICAGO

W. P. LOMBARD, M.D., ANN ARBOR

W. T. PORTER, M.D., BOSTON

VOL. III.—No. IX.

*Issued April 1, 1900*

BOSTON, U.S.A.  
GINN AND COMPANY

1900

## CONTENTS.

---

STUDIES ON REACTIONS TO STIMULI IN UNICELLULAR ORGANISMS.—VI. ON THE REACTIONS OF CHILOMONAS TO ORGANIC ACIDS. <i>By H. S. Jennings</i> . . . . .	397
NOTES ON THE INDIVIDUAL PSYCHOPHYSIOLOGY OF THE CRAYFISH. <i>By George V. N. Dearborn</i> . . . . .	404
ON THE ARTIFICIAL PRODUCTION OF NORMAL LARVÆ FROM THE UN- FERTILIZED EGGS OF THE SEA URCHIN. <i>By Jacques Loeb</i> . . . .	434
ON THE MAXIMUM PRODUCTION OF HIPPURIC ACID IN RABBITS. <i>By F. H. Parker and G. Lusk</i> . . . . .	472

---

THE AMERICAN JOURNAL OF PHYSIOLOGY is issued monthly. Each volume will contain about five hundred pages. The price of one volume sent postage free to subscribers in the United States and Canada is five dollars. To subscribers in other countries, five dollars and twenty-five cents (£1 2s.; marks, 22; francs, 27), payable in advance.

---

Subscriptions, manuscript, and all other communications should be sent to Dr. W. T. PORTER, 688 Boylston Street, Boston, Mass., U.S.A.

---

Contributors will receive fifty copies of their papers free; additional copies may be obtained at cost.

---

*The American Journal of Physiology is represented:*

In America, by GINN & COMPANY, 9 Tremont Place, Boston, Mass.

In Germany by R. FRIEDLÄNDER & SOHN, Berlin, N. W., Carlstrasse 11.

---

Copyright, 1900, by GINN & COMPANY.

---

Printed by John Wilson and Son, at The University Press, Cambridge, Mass.

*Entered at the Post Office at Boston and admitted for transmission through the mails  
at second class rates.*
